Delhi, India – webuxhimanshu@gmail.com – +91 7970686221

[GitHub](#) – [LinkedIn](#) – [Portfolio](#)

Summary

Full Stack Developer with hands-on experience developing end-to-end web applications using React, Next.js, Express, and MongoDB. Strong fundamentals in JavaScript and Data Structures & Algorithms, with practical exposure through projects and job simulations. Seeking a full stack software developer role.

Technical Skills

Programming: JavaScript (ES6+), TypeScript, python, SQL, Shell Scripting

Technology/Frameworks: React, Next.js, React Native, Node.js, Redux-Saga, Zustand, Socket.IO, GSAP, Framer

Databases: PostgreSQL (Neon), MongoDB, Firebase, Redis, ChromaDB, Drizzle ORM, Prisma

Soft Skill: Problem-solving, Analytical Skills, Communication, Teamwork, Self Starter, Self Motivated, Debugger

Projects

EventGo: AI-Integrated Event Planner

React Native, Node.js, Express.js, MongoDB, ChromaDB, NLP, LLM APIs

Apr 2026

- Developed an AI-powered event planning application that generates personalized décor and prop recommendations using natural language input
- Implemented semantic search using text embeddings and vector similarity (ChromaDB) to match user queries with relevant event setups
- Designed a hybrid recommendation pipeline combining semantic retrieval, rule-based and LLM-based re-ranking
- Integrated LLM APIs to generate contextual tags, improving transparency and user trust
- Built scalable REST APIs and optimized queries for low-latency real-time recommendations
- [GitHub Repository](#) [Demo screenshots](#)

PM_Manager: Team Project & Task Management System

Next.js, TypeScript, MongoDB, Tailwind CSS, JWT, Zod

March 2026

- Engineered a full-stack project management platform with role-based workflows for admins and team members
- Built secure authentication and authorization pipelines using JWT sessions and protected API route middleware
- Developed task assignment, Kanban-based progress tracking, team collaboration, and project workflow management features
- Architected scalable REST APIs with Next.js App Router, MongoDB, and Zod-based request validation
- [GitHub Repository](#) — [Live Demo](#)

ContentAI: AI-Powered Social Media Campaign Generator

Next.js 16, Tailwind CSS, Drizzle ORM, PostgreSQL, Auth.js (NextAuth), OpenRouter API

jan 2026

- Engineered a full-stack generative AI dashboard using Next.js App Router and OpenRouter APIs to generate tailored multi-platform captions, trending hashtags, and creative marketing ideas.
- Designed and implemented database persistence utilizing Drizzle ORM and Neon Serverless PostgreSQL to store, query, and instantly re-hydrate past campaign generations into the client state.
- Reduced client-side JS using RSC, achieving 93 Lighthouse and 100 SEO performance score
- [GitHub Repository](#) — [Live Demo](#)

Education

Bachelor of Technology in Computer Science and Engineering

Dr. A. P. J Abdul Kalam Technical University

2022–2026

Achievements

- Built and deployed 14+ full-stack projects using React, Next.js, and React Native across e-commerce, real-time apps, SaaS dashboards, and landing pages using MVC architecture
- Contributed to open-source projects with 20+ GitHub stars
- Solved 150+ DSA problems on Leet Code and Geeks for Geeks covering arrays, hashmaps, sliding window, and two pointer patterns
- Developed an e-commerce platform connecting customers with vendors offering customized merchandise leading to a 25% increase in vendor sales
